OKLAHOMA INTERSTATE AND INTRASTATE JOINT AND INTERLINE REDUCED CITY-PAIR FARES

The following section contains city-pair fares that are lower than walkup mileage-based fares. Although shown in only one direction, the fares in this section apply in both directions, unless otherwise indicated. If the APP Column is blank you can safely quote and sell this fare in the opposite direction. If the APP Column contains a double asterisk "**", that indicates the fare is not available in the reverse direction. For the most part this would pertain to casino fares or fares that are restricted to a specific schedule.

Travel may be routed over the lines of the carriers shown in Section 2, except those indicated as participating in mileage fares only.
In addition, an "I" in the APP Column means that the fare is an interline fare. Greyhound does not provide the entire service.

All fares in this section apply from and to the points specifically named only. Do not use the fares to blanket intermediate points unless indicated in the "RESTRICTION" column.

Pay particular attention to any restrictions associated with a fare. Restrictions are explained in the Restriction Code Section of this Manual.

For agents in and passengers traveling to metropolitan areas, the "PM" shown in the Restrictions column indicates that the city-pair fare also applies to surrounding communities, i.e., the fare between Santa Monica, CA and Mesa, AZ would be the same as the fare between Los Angeles, CA and Phoenix, AZ. Refer to the Primary Markets section of this Manual for a complete list of primary market cities and the surrounding communities.

Mark all tickets sold using fares in this section:
"OKCP"

I - in APP column indicates fare is interline fare only
** - in APP column indicates fare applies in direction shown only
